

Cabinet Office

CARBON REDUCTION PLAN GUIDANCE

Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier¹ and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard² and Guidance³, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

¹Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

Carbon Reduction Plan

Supplier name: Getinge Limited

Publication date: 18/09/2023

Commitment to achieving Net Zero

Getinge is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021:
Additional Details relating to the Baseline Emissions calculations.
<p>Getinge has raised our sustainability ambitions, which is described in the company's Sustainability Framework. This target to become net zero will be reached by a stepwise approach in several areas, such as switching to renewable energy sources, updating the vehicle fleet, changing business travel routines, finding new and smart logistics alternatives.</p> <p>In 2022, Getinge submitted its global environmental targets for validation to the Science Based Target initiative and decreased the CO2 emissions by 48% in 2022 compared to 2021, while continuing to supporting customers and society at large. As a global medtech company, Getinge's impact is inherently a social one - to help improve and save people's lives.</p> <p>Getinge operate premises in the UK, employs over 295 people and uses a field-based fleet of 215 vehicles to carry out sales, service and marketing activity. Getinge is the ultimate parent of Getinge Limited and is responsible for operations, including distribution of products from Europe to the end user location</p> <p>Getinge is committed to Science Based Target initiative (SBTi) and during 2022 the company's environmental targets were submitted for validation. The long-term target is to become a net zero company by 2050, with the short-term target of becoming CO2 neutral without offsetting in own production by 2025.</p> <p>FY21 is the baseline year future carbon reporting as outlined in this Carbon Reduction Plan</p>

Additional Scope 3 reporting of carbon emissions has been undertaken in the current reporting year compared to the baseline year.

Getinge Limited do does not manufacture products within the UK. Only product/equipment distribution, warehouse and office operations are directly in scope for UK operations.

Please note: Baseline data year of 2021 was during the pandemic; therefore, data is subject to impact of lockdown.

Baseline year emissions: 2021 (UK Only)

EMISSIONS	TOTAL (tCO₂e)
Scope 1	393.14 tCo2e (Vehicle emissions)
Scope 2	64.19 tCo2e purchased electricity
Scope 3 (Included Sources)	3296.91 tCo2e Employees commuting 1.17 tCo2e Upstream logistics & distribution 134 tCo2e Downstream logistics & distribution 220 tCo2e Business Travel 13.74 tCo2e Waste 2928 tCo2e
Total Emissions	3754.24 tCo2e

Current Emissions Reporting

Reporting Year: 2022 (UK Only)

EMISSIONS	TOTAL (tCO₂e)
Scope 1	256.99 tCo2e (vehicle emissions)

Scope 2	104.72 tCo2e (Purchased Electricity)
Scope 3 (Included Sources)	1604.49 tCo2e 104.72 tCo2e (Purchased Electricity) Employees commuting 1.17 tCo2e Upstream logistics & distribution 125 tCo2e Downstream logistics & Distribution 183 tCo2e Business Travel 43.32 tCo2e Waste 1252 tCo2e
Total Emissions	1966.2 tCo2e

Emissions reduction targets

To continue our progress for achieving Net Zero Carbon Emissions prior to the Government's target of 2050, we have adopted the following carbon reduction targets.

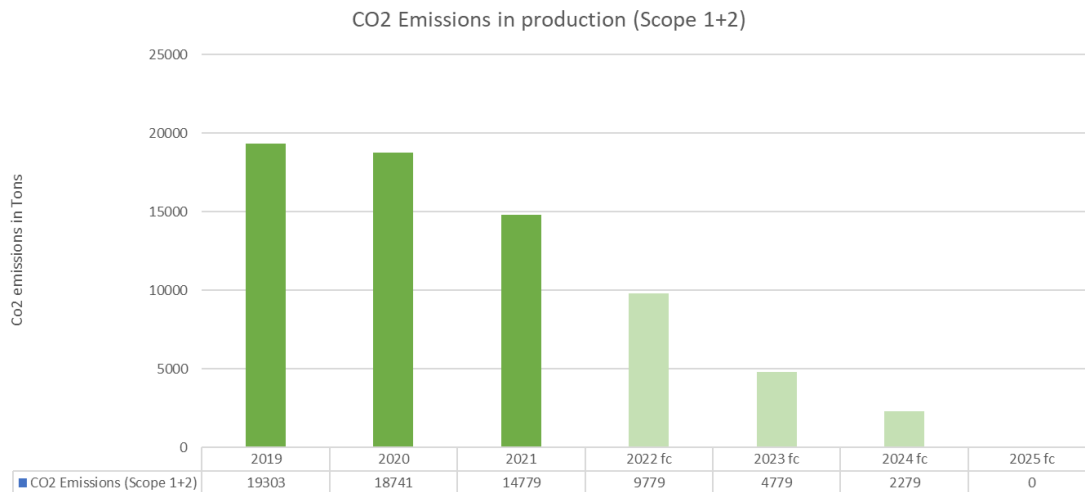

Getinge Global Sustainability Strategy

- Committed to Carbon neutral in own production by 2025 (Scope 1 & 2)
- Committed to 90% reduction of all by 2030 (Scope 1 & 2)
- Getinge to be Net Zero by 2050 (Scope 1, 2 and 3)

By 2025, Getinge aims to be carbon neutral in scope 1 & 2 emissions in own production. Carbon offsetting instruments (such as carbon credits) are not used to reduce emissions, to comply with the standards of the Science Based Target initiative (SBTi). The defined long-term target is to become a Net zero company by 2050. This means that Getinge will reduce emissions from the whole value chain by 90% vs baseline 2021 and balance the remaining 10% by removals. This, together with the 2030 mid-term target, has been submitted to the SBTi for verification.

Our first goal towards 2025 (Scope 1 & 2) is to ensure all our production sites have energy reduction plans in place to improve energy efficiency and reduce emissions

The table below outlines Getinge's Global Carbon Neutrality forecast in own operations (Scope 1&2)

Getinge are committed to reduce Carbon emissions to become Net Zero by 2050. To do so we have set out several Carbon Reduction Initiatives

Following EcoDesign principles Getinge are redesigning products to for example reduce weight and switching to low carbon materials including plastic, steel and aluminium. Choosing the lowest emitting transport mode possible is also necessary to reach our future carbon emission targets.

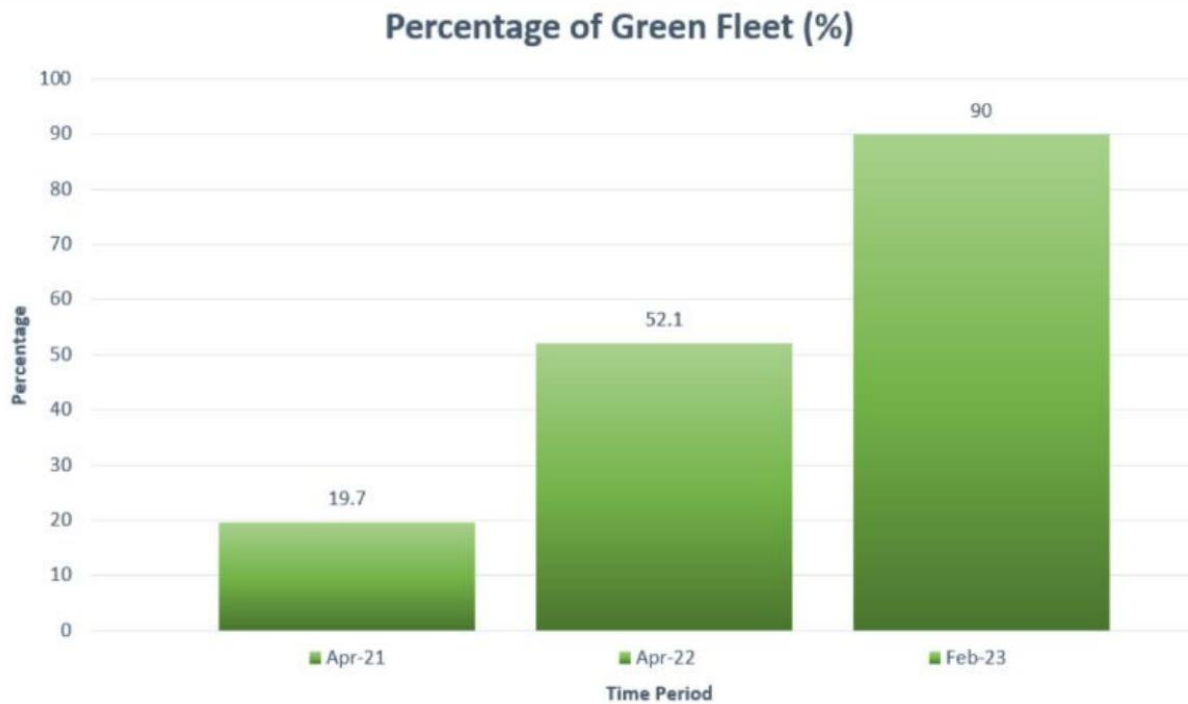

Getinge UK Carbon Reduction Strategy

In line with the Getinge Global Strategy, Getinge Limited are focused on applying these global targets and Initiatives to our local regions, including the UK.

Through environmental management measures and projects that have been completed or implemented since the 2021 baseline, the carbon emission reduction achieved by these schemes equate to 1,788.04 tCO₂e, a 47.6% carbon reduction against the baseline of 2021.

Getinge UK Carbon Reduction Completed Projects 2022 and achievements

1. Car Fleet: Our UK/I Fleet is now officially 90% 'green'. Out of 220 vehicles on the road, over 140 are electric (the rest Hybrid).

2. Reduction in Waste. All offices focused on reduction of waste through reducing the amount of bin cycles to reduce the CO₂, this resulted in a 42% reduction in waste CO₂.
3. Reduction in Logistics and distribution CO₂ by 13% (upstream & downstream)

Getinge UK 2023 Strategy

1. Adopt renewable and green energy sources (vehicles, premises and logistics)
2. Measure, report & influence Scope 3 emissions throughout the value chain
3. Reducing CO₂ through partnership providers

Getinge UKI 2023 Commitments

From August 2023 Getinge UK are centralising all UK offices to one site, utilising new and innovative approaches to support our carbon reduction targets.

The new office in Derby will support our drive to reduce carbon emissions by;

- Enhancement on building regulations for air leakage
- 30% reduction of CO₂ utilising low energy material compared against conventional office space
- Designed for flexibility and low operational cost
- Utilize design of natural light and low energy LED lighting (LED/PIR lighting)
- Include 86 Solar panels generating localised energy source
- Rainwater harvesting
- Access to electric car charging points.

In addition to the centralising of our UK offices, Getinge UK will continue to drive the reduction in carbon emissions in scope 2 by targeting 100% green fleet of vehicles by 2025.

Getinge UK 3rd Party Partner Carbon Reduction requirements

As part of our overall commitment to support the NHS Carbon Reduction target, Getinge Limited shall be aiming to collaborate with partners that are aligned to our Net Zero strategy.

Providers such as waste management, UK distribution and logistics partners will be subject to review and alignment to our Net Zero target, this will include;

- Net carbon reduction
- Biodiversity & sustainable environments ambition
- Responsible operating practices & partnerships

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁴.

Signed on behalf of the Supplier:

Avril Forde

President | North Europe Region | Getinge
