FIRST ORDER FOR GETINGE'S NEW ISOCYT FREJA

The new Getinge isolator for cytotoxic preparation in hospital pharmacies, ISOCYT FREJA, was launched at the Medica trade fair in Düsseldorf, 19-22 November 2008.

The first order was placed by the hospital of Bourg en Bresse, south of Lyon, France. The hospital ordered two units and the choice was based on:

- ergonomics and safety (locked chamber in front of the operator)
- robust construction in stainless steel and glass
- H₂O₂ (hydrogen peroxide) bio-decontamination.

Moreover, the Getinge Group's solid technical background means a sound investment base. Mrs Fabienne Morey, a pharmacist at the hospital pharmacy of Bourg en Bress, says:

“We are really looking forward to receiving our new isolators in May, as the ISOCYT Freja will be a big step in improving both operator and patient safety. With its industrial background, ISOCYT Freja is a genuine product that complies with the cGMP and really differentiates itself from the other isolators.”
