

# Getinge Environmental Policy

## Getinge Policy

Getinge's overall environmental objective is to contribute to a sustainable society. We are committed to optimizing the use of energy and natural resources, minimizing our emissions to air and reducing the environmental impact of our waste handling.

Therefore we shall:

- Integrate environmental considerations into all our activities.
- Consider environmental legislations and regulations as minimum requirements.
- Encourage and empower our employees to take personal responsibility for contributing to a sustainable development.
- Continuously improve our environmental management system to enhance environmental sustainability and regularly report our environmental performance to our stakeholders.
- All manufacturing units will implement and certify management systems that meet the ISO 14001 standard. New operations must have certified management systems in place within two years of being acquired or established.
