

# Data Notice – Endoscope reprocessing (IC)

## Purpose of this notice

This data notice is provided in accordance with Article 3.2 of Regulation (EU) 2023/2854 (the “Data Act”) and aims to inform you about the product data generated and your rights related to that data as a prospective user of washers being connected products.

Data that is accessible to you through the device’s user interface and typically utilized as part of normal use, is not included in this data notice. Also note that the information below regarding type of data, format, volume etc. may vary based on the use and setup in each individual case. Please contact us if you have any questions related to your devices.

## Product data generated by the connected product

| Product | Type of data            | Format of data | Estimated volume                 | Capable of generating data continuously and in real time |
|---------|-------------------------|----------------|----------------------------------|--|
| ED-Flow | Device Performance data | Binary         | 100-200 bytes every 1-2 seconds. | Yes  |
|         | Usage data              |                |                                  |  |
|         | Meta data               |                |                                  |  |
| EDS8    | Process data            | PDF            | Approx. 50kb per process         | No   |
|         | Device Performance data | Binary         | 100-200 bytes every 1-2 seconds. | Yes  |
|         | Usage data              |                |                                  |  |
|         | Meta data               |                |                                  |  |
|         | Process data            | PDF            | Approx. 50kb per process         | No   |

## Storage of product data and retention time

| Product | Capable of storing data on-device or on a remote server? | Retention time   | Possibility to delete product data manually   |
|---------|--|--|---|
| ED-Flow | Yes, both.   | On device – maximum 100 processes<br>Remote server – device lifetime | No, not on the device.<br>For data in Fleetview, deletion could be made upon request. |
| EDS8    | Yes, both.   | On device – maximum 100 processes<br>Remote server – Indefinitely    |   |

## How you may access the product data

If your product is connected to Fleetview, all the product data will be accessible to you through that platform. If not connected, it can be accessed by contacting Getinge as described below.

## Contact details for access requests

To request access, or ask questions about data access, contact Getinge through:
