

Data Notice – Fluobeam

Purpose of this notice

The purpose of this data notice is to inform you, in accordance with the transparency requirements for connected products under Article 3.2 of the EU Data Act, about the product data generated through your use of Fluobeam and your rights regarding such data.

Data that is accessible to you through the device's user interface and typically utilized as part of providing care is not included in this data notice. Also note that the information below regarding type of data, format, volume etc. may vary based on the use and setup in each individual case. Please contact us if you have any questions related to your devices.

Product data generated by the connected product

During use, the device may generate the following types of data:

Type: Log files - System parameters monitoring such as temperature, voltage, current, system uptime along with additional system-related information such as error logs, software version and commands transmitted from the software to the control box.

Format: Log files are stored in *.txt format

Estimated volume: product data is of the order of several megabytes (MB).

Capable of generating data continuously and in real time: Yes

Storage of product data and retention time

The log files will be stored within the Fluobeam system. There is no predefined retention limit or time for the log file, as the system has sufficient storage capacity. Users may delete log files from the Fluobeam system at any time if needed.

How you may access the product data

Log files can be accessed directly by the user through USB. This is described more in detail in the technical description of the product.

Contact details for access requests
