

Getinge USA, LLC Life Science Installation Responsibilities

Getinge will provide specifications, rough-in drawings, or construction cut sheets for review by architects/contractors/owners and for use by the necessary trades performing the installation of the equipment. Installation of the equipment by Getinge is an additional charge and is not included in the price of the equipment (unless otherwise specified in the equipment Proposal). In no event will Getinge be responsible for providing for structural in-wall and above-ceiling supports for wall-mounted or ceiling-mounted equipment.

Customer agrees to provide a safe and healthy work environment for all employees, contractors, and representatives ("Personnel") of Getinge while on Customer's premises consistent with all applicable local, state, and federal health and safety laws, regulations, and industry standards. Where required, the Customer shall provide any required site-specific training or orientation necessary for safe access and performance of work on Customer's premises. Personnel of Getinge reserve the right to stop work or refuse to perform work at the Customer site if they, in good faith, believe that doing so would pose a health or safety risk, and the Customer agrees not to penalize or retaliate against Getinge or any such Personnel for taking such action in good faith.

Installation Supervision

Includes equipment dis-assembly, rigging to loading dock, and if purchased removal from customer site and recycle charges.

Please refer to our "Terms & Conditions" for additional information relating to Getinge Installation Services

*** If installation is not performed by an authorized Getinge representative:

- 1) Customer will be responsible for all costs related to receiving, accepting, unloading, moving into place, uncrating, installing, and connecting to the necessary service lines, final connections and start-up. See Getinge's Limited Equipment Warranty.
- 2) Various components (piping and valving, etc.) may be removed prior to or during shipment for safety reasons; Getinge will not be responsible for labor expense involved in the reassembly or reconnection of those components at the job site.
- 3) Getinge will not be responsible for damage to components or equipment as a result of improper storage, installation, accidents, misuse, alteration, incorrect

utility hook-up or start-up after delivery to Customer facility. Getinge will not be responsible for any cosmetic damage to components or equipment that occur post-delivery.

- 4) Customer must engage Getinge to perform a final checkout before the equipment warranty is activated. Checkout services and any installation changes or equipment adjustments made by Getinge during the final checkout, are billable to Customer at Getinge's then generally available hourly service rates and minimum charge for service time, travel and waiting time. Failure to engage Getinge to perform final checkout services is considered an agreement by Customer to hold Getinge harmless from and against any property damage, personal injury or death related to the equipment, its use or operation.
- 5) If Customer does not engage Getinge to perform a final checkout of the equipment, the equipment warranty is voided and Getinge will not be responsible for equipment performance limitations or failure of the equipment to meet published performance specifications.
