

EZTest

Biological indicator monitoring system

EZTest is a self-contained biological indicator for monitoring steam/flash steam, ethylene oxide, hydrogen peroxide, or propylene oxide sterilization.

EZTest contains bacterial spores on a filter-paper carrier packaged within a small, thermoplastic culture tube. Inside the thermoplastic culture tube is a sealed-glass ampoule of specially-formulated soybean casein digest culture medium containing a colour indicator which turns a dramatic yellow when spores grow.

EZTest is easy-to-use and produces visual results within 24 hours (steam, hydrogen peroxide, or propylene oxide) or 48 hours (ethylene oxide) without laboratory transfers.

Key Features

- FDA 510(k) cleared (Steam and EO)
- 24 hour results for Steam, H₂O₂ or PPO
- 48 hour results for EO
- Easy to culture
- No laboratory required
- Dramatic colour change
