

Vasoview Hemopro

Innovation with a purpose

Innovation with a purpose

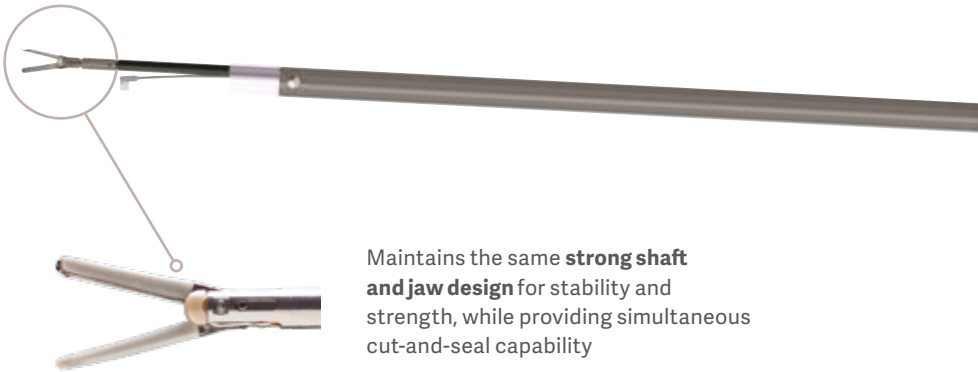

Getinge's commitment to clinicians' needs drives innovation and helps improve outcomes. Used in more than 2 million procedures, Getinge's Vasoview systems are the recognized standard of care for Endoscopic Vessel Harvesting (EVH) procedures. Vasoview Hemopro was designed and developed with input from clinicians who perform EVH procedures every day. Continually advancing to meet clinicians' needs, Getinge brings gold standard technology and world class service together to help clinicians improve quality of care.

Improved ergonomics

- Ergonomic handle
- One-finger control

Safety features

- Improved switch design
- Improved toggle control

Maintains the same **strong shaft and jaw design** for stability and strength, while providing simultaneous cut-and-seal capability

Ergonomically designed handle
provides comfort and ease-of-use

Pig tail connectors are compatible
with current VASOVIEW HEMOPRO
extension cable and power supply

Visible steps for easy insertion
of the scope and harvesting tool
into the cannula.
