

Getinge GSS610N Steam Sterilizer

For maximum throughput

Getinge GSS610N is a new steam sterilizer targeting the hospital segment, where there is a need for high throughput of a variety of goods.

Every hospital faces the same challenge in the sterilization department: optimizing throughput with consistent and accurate results, together with a low and predictable total cost of ownership.

Achievements

- High efficiency and throughput.
- Optimized utility consumption.
- Intuitive user-interface.
- Hygienic design.
- Compatible with Hupfer Känguruh System.

Benefits

- Automatic start-up system effectively reduces water and energy consumption, and an additional sterilization cycle per shift can be added to boost overall throughput.
- The GSS610N automatically optimizes process time and media consumption for each load.
- The innovative user interface requires less training and can be easily operated by staff with different experience levels.
- High-quality, polished stainless steel surfaces feature smooth, rounded corners. Flushed chamber door and limited seams to facilitate fast and effective cleaning.
- The Getinge GSS610N is compatible with the Hupfer Känguruh System, extending the efficiency of your department and optimizing your capital investment.
