

Tomorrow's efficient healthcare created today

Planning & Design

The efficiency of your care outcomes is highly dependent on a smooth and streamlined workflow throughout your hospital. We offer planning and design of your facility, be it a room or a whole department, and workflow concepts with visual renderings. We have a decade of expertise and are used to work in close collaboration with architects, planners and clinicians.

Planning for a better hospital experience

As a manufacturer of premium hospital equipment and provider of clinical solutions, we understand the demands you face every day. We offer efficient workflow solutions to overcome your challenges in the OR, the ICU and in the sterile reprocessing departments. So you can focus on what you do best – caring for patients.

3D visualization support

Using the latest technology in 3D drawings, we will support your team in making informed decisions on the optimization of your hospital workspace. Also, you can make use of BIM ready CAD symbols for efficient planning.

IT integration

You can effectively improve the clinical environment, and the way you work, with our state-of-the-art hospital efficiency software solutions. Creating a better, safer and calmer hospital experience for both staff and patients.

Project realization

Our experienced project team leaders are your one point of contact. We work closely with you from the start to the final handover, completing the project on time, budget and quality target.

Part of Getinge 360° Services

To provide you with the best possible services, we are considering the entire journey of delivering healthcare. From value creation partnerships and financial solutions, to planning and design of workflows, project implementation, education and training, digital services and equipment uptime through preventive maintenance services. All aligned for your operational and financial goals.
