

Making your healthcare project come to life

Project Implementation

As a provider of state-of-the-art hospital equipment and clinical solutions, we offer a range of services for coordinating and realizing your next project. Through every phase of project planning, development, installation, training, implementation and startup, even during daily workflows, we are here to guide your project towards success.

Meeting the highest expectations

When deciding for a new architectural, technical or clinical solution, the implementation and delivery of the project is always a top priority. We help you ensure cost control, on-time delivery, efficient implementation and risk management. Our project team will monitor, control and communicate the project progress according to mutual agreements and set expectations to meet your needs.

Effective integration

Our experienced teams, located around the world, will ensure effective cooperation with your hospital infrastructure building teams, IT, biomedical and other technical groups, including third party systems, teams and vendors.

Driving project implementation engagement

We supply tailored training and project information across the full spectrum of hospital employees and key stakeholders, to ensure a smooth implementation and positive project outcome.

Responsibility all the way

We will support you with valuable guidance during implementation, upgrades and updates, and for troubleshooting to ensure continuous satisfaction with your Getinge solution.

Part of Getinge 360° Services

To provide you with the best possible services, we are considering the entire journey of delivering healthcare. From value creation partnerships and financial solutions, to planning and design of workflows, project implementation, education and training, digital services and equipment uptime through preventive maintenance services. All aligned for your operational and financial goals.
